	SMALL															LARGE					XXL >>					
																MEDIUM					X LARGE					

N.B. Measurements should be made wearing your suit

Both types of harness are identical in sizing on the waist. The Small Back Mounted Harness has a shorter back length than the Small OTSCL Harness and is designed for use with the Small version of the BM Counterlung itself (see guide) which together are designed as a 'petite' size BMCL. The other sizes - M, L, XL & XXL - should be matched with the 'Standard' size Back Mounted Counterlung

If you have any questions about sizing please contact the factory on 01326 563834
