\* These Scrubber durations are achieved in deliberately harsh test conditions and so in reality times may be longer. However, these manufacturer guide times **MUST** be adhered to unless you have a Scrubber Monitor fitted which accounts for real-time conditions. See Dive Duration for more information.

† Cylinder-hire is readily available worldwide and so it is common practice to travel without cylinders and if you pack the scrubber and other parts in your hand-luggage these unit weights may be reduced by approx. 10kg for the hold weight when flying.
